

# Verified First

## EDUCATION VERIFICATIONS

Ensuring quality hires.

Replacing a poor hire can cost 90-200% of an employee's salary—not including the organizational morale and productivity loss due to a poor hire (SHRM).

Our **education verification** process is designed to empower you with the information you need to better ensure quality hires. Here's how:

### Colleges, Universities, & Technical Institutes:

For institutions utilizing the National Student Clearinghouse (NSC), we will submit a request directly to them. If the NSC needs to conduct additional research to verify the information, we let our clients know immediately.

If an institution's vendor is unknown, our verifications team will make **6 attempts in 4 days** to verify a candidate's education directly with the institution.

### High Schools:

Our verifications team will make **6 attempts in 4 days** to verify directly with the high school if no known vendor is utilized by the institution.

We will pass through any fees associated with these services.

### GED Verifications:

All GED Verifications are verified through the state's **Department of Education**. We will work with a vendor to complete this verification.

We will pass through any fees associated with these services, as well.
