CMMC: achieve compliance… maintain compliance
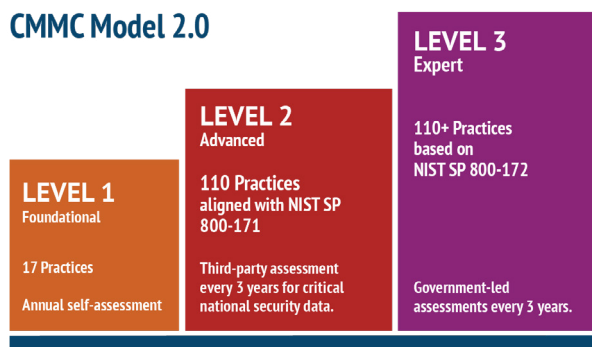

Cybersecurity is one of the biggest threats to businesses today. Cybersecurity Maturity Model Certification (CMMC) was established by the United States Department of Defense (DoD) to assess defense contractors' ability to protect Controlled Unclassified Information (CUI) and Federal Contract Information in accordance with federal and DoD standards, most notably NIST SP 800-171. CMMC will soon become a requirement to work as a DoD contractor, subcontractor, or supplier.

CMMC has three levels of security requirements which relate to the sensitivity of the information an organization receives or creates: Functional (L1), Advanced (L2), and Expert (L3). Organizations that store, process, or transit CUI are required to certify at Level 2 every three years. This certification requires assessment by an approved third-party CMMC assessment organization (C3PAO).

CMMC Model 2.0

LEVEL 1
Foundational

17 Practices

Annual self-assessment

LEVEL 2
Advanced

110 Practices aligned with NIST SP 800-171

Third-party assessment every 3 years for critical national security data.

LEVEL 3
Expert

110+ Practices based on NIST SP 800-172

Government-led assessments every 3 years.

An affordable, accelerated, low-risk path to CMMC compliance

CMMC requirements are exacting, and the assessment process is rigorous. But being ready for CMMC doesn't need to distract your organization from focusing on its core business.

NeoSystems provides government contractors with a clear and direct path to achieve and maintain CMMC compliance, and to prepare for a third-party assessment. You can achieve compliance quickly and affordably with our CMMC-mapped solutions.

NeoSystems offers flexible alternatives based upon your organization's business needs, IT, and current security posture. We bring your organization into CMMC alignment by augmenting and upgrading your current systems and processes as well as by providing secure, compliant computing enclave solutions.

Shift compliance burdens from you to us

Our managed services shift compliance burdens from you to us. We take the responsibility of preparing you for your CMMC assessment and for maintaining a strong, compliant cybersecurity posture with this three-step approach.

Achieve We will implement a compliant, secure IT environment following a NeoSystems reference architecture

aligned with your organization's IT and business requirements. We'll develop a System Security Plan (SSP), policies, procedures, and training materials and help curate the documentation, artifacts and evidence that will be required for your certification.

Manage We can augment your existing IT resources take on full responsibility for IT operations as needed, including 24x7 monitoring, IT on-demand support, system patching and maintenance, and problem resolution.
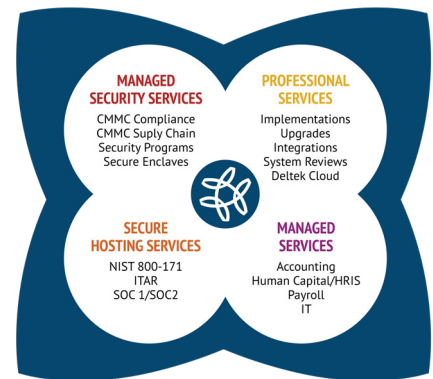

Our comprehensive end-to-end security program includes incident response management; vulnerability, configuration and patch management; and network and endpoint compliance.

Maintain Compliance isn't an end state, it's a process. We'll ensure your environment remains secure as the threat landscape continues to evolve and change, as your IT requirements scale and grow with your business, and as new government regulations and standards emerge.

With NeoSystems, CMMC doesn't need to distract your organization from focusing on your core business.

About NeoSystems

If your business is challenged by government regulations or your back office overly burdened, NeoSystems can help. As the experts in compliance and back-office functions, we can take accounting, finance, payroll, HR, IT and Information Security off your plate. We bring experience, best practices, technology, and compliance assurance to the table, allowing you to focus on your mission: winning new contracts and improving your bottom line.

We understand back-office, compliance, and cybersecurity so you don't have to.
