

## Success Stories

Ingentis org.manager is the leading software for the automated creation of custom organizational charts and the visualization of key metrics. Today more than 1,700 customers worldwide trust in our software. Here is a selection of customer projects whose main objective it was to gain an overview of their organizational structures and the necessary insights to make informed business decisions.

### Neptune Energy

The leading, international exploration and production company Neptune uses Ingentis org.manager to provide access to a visualization of the organizational structure for all employees in all subsidiaries as well as accurate data for budget planning and forecasting processes. Additionally, Neptune makes use of the simulation feature to model alternative organizational structures and evaluate which scenario contributes best to their business goals.

### Merck

After having used Ingentis org.manager on-premises for many years, one of the oldest pharmaceutical companies worldwide decided to move to the cloud. Ingentis org.manager supported Merck in this project by visualizing data during the migration process allowing for a quick detection of errors. With Ingentis org.manager Merck continues to provide transparency to employees and access to key metrics to managers and HR business partners also in the cloud.

### CGI

With Ingentis org.manager, CGI, one of the largest IT and business consulting firms in the world, now finally has a tool that brings visibility to their complex global organizational model. Today, it is mostly used by the company's leaders. The software ensures that org charts and key metrics are always up to date. This has made Ingentis org.manager an integral part of the so-called Global Ops meeting, a quarterly meeting of CGI's top 100 leaders.

### Mainova

Thanks to Ingentis org.manager, the energy provider Mainova Corporation, no longer has to make manual efforts to create and distribute reports on key figures to those responsible. Besides sending out standardized reports on a regular basis, the software also reports on specific circumstances like the exceedance of defined thresholds such as absence rates. Before introducing this automated email reporting, Mainova has already been using Ingentis org.manager for the data visualization, compensation management and for an interactive position/job family catalog.

### Hutt City Council

All in one place: The Hutt City Council in New Zealand uses Ingentis org.manager to visualize not only their organizational chart but also the contact details of its 450 employees as well as floor plans – all combined in a single, clearly structured HR dashboard. The implementation of the org charting tool comes with essential advantages such as improved transparency, flexibility, and ease of use.

### Vancouver Police Department

When implementing Ingentis org.manager, the Vancouver Police Department was able to fully rely on the insights and expertise of Ingentis for every step of the way. The response to the new automated org charts was overwhelmingly positive. Now, the employees of the department can be sure that the data they are seeing is accurate and up to date. The HR team is trained in the basics of setting up data and to act as day-to-day editors.

### REWE Group

The retail and tourism corporation uses Ingentis org.manager to visualize the company structure with more than 270,000 employees. The software's plug-and-play functionality enabled a quick implementation in only a few hours. As the software is directly linked to the SAP system, the manual creation of organizational charts is no longer necessary. The org charts are displayed on the Intranet according to the company's corporate design.
