

# A2B Tracking RFID Solutions

## RFID Asset Management

Performing accurate and timely inventory is mission critical, whether tracking serialized assets or non-serialized stock and impacts every aspect of your business. The A2B Tracking software platform is purpose built for asset management and inventory control using RFID and barcode technologies that deliver significant time savings while improving inventory accuracy and visibility of critical assets, spares, stock and equipment.

A2B Tracking's solution leverages Zebra's best-in-class hardware including Zebra Rugged Tablets, Zebra Touch Computers and Smartphones, Zebra RFID Handheld Readers, Zebra Fixed Readers and Zebra RFID Tag Printers. A2B Tracking's asset management solution is cloud-based and easily integrates to your environment. When you deploy A2B Tracking's software, you'll receive instant visibility to your asset's location and when an asset has moved.

### A fully featured Asset Tracking Solution

- > Perform fast and accurate inventories
- > Leverage RFID tracking in the cloud
- > Compatible with all existing barcode tags
- > Expedite locating assets with Pro-Locate™
- > Increase asset and resource utilization
- > Improve audit readiness
- > Enhance security for high value items
- > Manage asset accountability
- > Zebra Fixed RFID portals provide always-on tracking

A2B's RFID Tracker App is compatible with Zebra's:

- RFD8500
- RFD40 with TC26
- MC3300R

## MANAGE YOUR ASSET DATA IN THE CLOUD

Our comprehensive cloud-based Asset Management platform stores your data in a secure, centralized database, enabling you to work from multiple locations anywhere in the world, so your asset data and reporting is always accurate and up-to-date. You can access our application from the web, Touch Computer, Smartphone or tablet. A2B Tracking software is a comprehensive web-based solution for asset accountability and a real-time representation of your asset’s location, custody and readiness.

## HIGHLIGHTED CAPABILITIES

### Main Web Console

- > Serialized asset tracking with assignment to custodians and locations
- > Non-serialized stock tracking to locations
- > Management of wall to wall inventories
- > Check-out and check-in assets
- > Report generator with output to Excel, PDF
- > Administrative controls

### Mobile

- > Perform wall to wall RFID inventories
- > Perform batch RFID inventories with Groupings
- > Pro-Locate™ with RFID to find missing assets
- > Assign assets to locations and custodians
- > Automated check-out and check-in
- > On-the-fly asset commissioning

### Fixed RFID Gateways

- > Provides always-on asset tracking
- > Identifies direction assets move and last known location
- > Continuous hands-free monitoring
- > Real-time asset identification and movement

Integrated RFID Portals can be installed at dock doors or egresses, to provide 100% autonomous data capture.
