

Introducing a new experience from

AIA Contract Documents

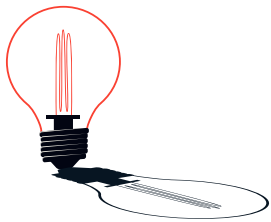

powered by **catina**

Deltek

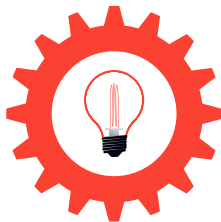

Marketplace Partner

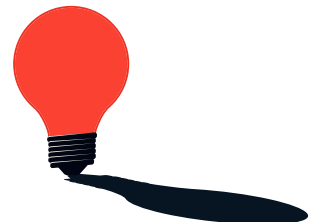

Catina is a next-generation solution for the AEC industry which allows you to create, finalize, and collaborate on all your contracting documents, plus analyze risk – all from a single, secure online platform. Built with your needs in mind. Backed by our trusted, industry-leading content and partnership with the American Institute of Architects.

Intuitive.

Powerful.

Innovative.

Collaborative, end-to-end online editing

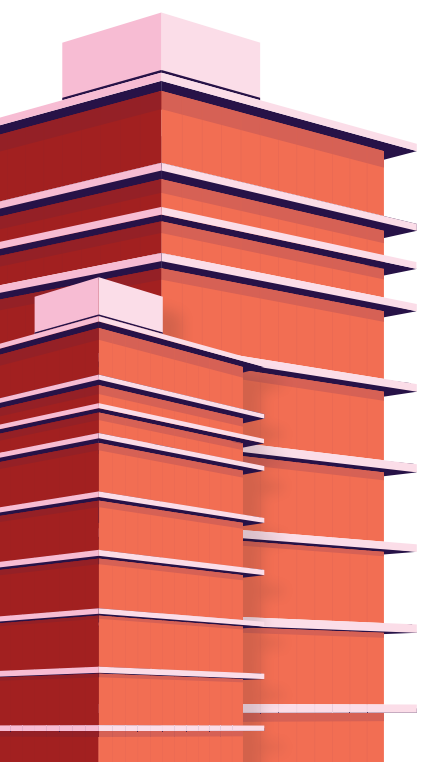

- Quickly draft documents and see who is contributing from your team.
- Monitor project progress with easy-to-use dashboards and create custom workflows to ensure documents are completed on time.

Easily search and generate documents

- Find documents by type, client, project, or geography and review the version history.
- Reduce risk, minimize data entry, and create consistency by defining clause and document templates.

Clause and Change Order analysis

- Zero in on contract hot spots with data-driven AI built into your editing experience.
- Identify building processes that are driving change orders on projects like yours so your team can take extra precautions.

It's time to build smart. Let **Catina** show you how.
